

Speaking the *whole* truth to power:

## Why We Need to Uncover the 9/11 Deception

Weds, August 10th 2016

9:00 a.m. – 11:30 a.m.

Université McGill – Pavillon Bronfman (Local 151), 1001, rue Sherbrooke  
Ouest Montréal QC Canada

Organized by: Consensus 9/11: The Best Evidence Panel  
[www.consensus911.org](http://www.consensus911.org)

### Who planned and conducted the attacks that took place on 9/11?

### New evidence tells us that the official explanation cannot possibly be true.

Unveiling the truth about 9/11 will shatter the pretext that plunged the world into 'endless war.' It could be a 'game changer' in the fight against existing and future interventions, militarism, and the progressive curtailment of civil and human rights. Establishing the truth about 9/11 will give enormous impetus to the global fight for social, economic and environmental justice for years to come.

**Speaking the *whole* truth to power** will showcase the work of three key members of the 9/11 Consensus Panel, a 23-person team of science academics, engineers, attorneys, commercial pilots, journalists, and others. In some of its 48 Consensus Points, the Consensus Panel has unearthed new evidence refuting the official claims about 9/11

Members of the 9/11 Consensus Panel who will speak at the World Social Forum: Elizabeth Woodworth, Graeme MacQueen & Niels Harrit.

**Elizabeth Woodworth** is the Coordinator and co-founder of the 9/11 Consensus Project and has been researching 9/11 evidence since 2006. A retired health science librarian, Elizabeth has coordinated the 'best evidence' medical methodology to refute 48 of the official claims made regarding the events of 9/11.

**Graeme MacQueen** is the former director of the Centre for Peace Studies at McMaster University. He is known for having collected more than 150 eyewitness accounts suggesting the Twin Towers were demolished with explosions on 9/11. He is the co-editor of the *Journal of 9/11 Studies* and author of *The 2001 Anthrax Deception*.

**Niels Harrit** was the lead researcher in a peer-reviewed paper published in 2009 that described the detection of active thermitic material in the dust of the Twin Towers and World Trade Center 7. Harrit is emeritus professor at the University of Copenhagen's Department of Chemistry. Since 2007 he has been actively involved in the global movement for 9/11-truth, and has made more than 300 presentations on 9/11 in 15 countries.

The session will be moderated by **Sean Sweeney**, labor educator and activist, based in New York.

## CONSENSUS 9/11:

### THE 9/11 BEST EVIDENCE PANEL

### ***9/11 'Best Evidence' Proves the Official Story is Not True***

*Fifteen years of research conducted by both reputable organizations and individual scientists and specialists has shown that there is no credible evidence to support the claim that nineteen hijackers led by Osama Bin Laden were responsible for the 9/11 attacks.*

*The idea that fires caused by ignited jet fuel weakened the structure of the Twin Towers and led to a total destruction of both buildings is groundless. On the afternoon of 9/11, World Trade Center 7 – an enormous forty-seven story steel-framed building located near the towers – completely collapsed at free fall acceleration even though it had not been hit by an airplane. The collapse has been attributed to “office fires” – even though a steel-framed skyscraper has never collapsed as the result of fires alone.*
